Dear Hiring Manager,

I am interested in the Backend Developer position at Barely Digital Operations GmbH. With a strong background in PHP development and experience in the Laravel framework, I can contribute effectively to your digital toll portals and traffic management solutions.

I bring extensive experience in PHP, SQL, and database optimization, demonstrated through successful projects. Throughout my career, I have maintained high coding standards and actively participated in code reviews, ensuring optimal system performance and maintainability. For example, in my current role at Islamic Azad University Electronic Campus, I demonstrated my technical capabilities by significantly improving application performance, including reducing their ticketing system's response time from 3.6 seconds to 0.056 seconds. This achievement showcases my ability to optimize and scale systems effectively, a skill crucial for your service-oriented architecture. Furthermore, my role included developing 17 products, showcasing my ability to manage multiple projects and adapt to various requirements. My background in applied mathematics further enhances my problem-solving skills.

I am particularly drawn to the role's focus on developing digital solutions for European transport systems and am excited about the opportunity to relocate to Augsburg. I value your commitment to supporting relocation and professional development.

I am confident that my technical skills and enthusiasm for continuous learning would make me a valuable addition to your team. Thank you for considering my application; I look forward to your response.

Sincerely,

Sajed Zarinpour Nashroudkoli
